Ability to preen post misting w/lighting for basking					
Experience Being Preened by Other Chicks					
Experience Preening Other Chicks					
Perches					
Perched Rope Perch					
Perched on Natural Branches					
Learn to chew on Safe tree branches (maple & apple)					
Transporter/Carrier: Model					
Longest time spent in transporter					
Time in transporter in car					
Physical Education-Flight					
Wears Flight Harness					
Harness Training Indoors					
Harness Training Outdoors					
Monitored Flight without a Harness					
Monitored Flight w/Partial flight feathers groomed (# of flight feathers groomed _____ at what age					

Socialization Skills	Desensitized	Comfortable with	Eager to learn	Trained w/ Reinforcement	Nurturing Vocal Clicker Granule Seed
Avian					
Exposed as Fledgling to Other Birds					
Was Raised With Clutch mates of Same Clutch					
Was Raised With Clutch mates of Different Clutch (Same Species)					
Was Raised With Clutch mates of Different Species					
Other Pets (We recommend caution when introducing pets)					
Has been Exposed to dogs with Supervision					
Has been Exposed to cats with Supervision					
Other					
Human Socialization					
Has been handled by both male & female caretaker					
Has been exposed to children					
Enrichment Skills	Desensitized	Comfortable with	Eager to learn	Trained w/ Reinforcement	Nurturing Vocal Clicker Granule Seed
Has been exposed to Outside					
Has been exposed to Television					
Has been exposed to Music					
Has been exposed to Radio					
Introduced to Foraging Box					
Introduced to Acrylic Foraging Device					
Introduced to Training Blocks					
Introduced to Shreddable Foraging Device					
Comments:					

Please allow this chick to have undisturbed sleep, especially in your store's nursery. Retire chick to resting quarters, cover the cage or install curtains in front of the viewing area periodically so that this chick can get time-outs during the day. This will help maintain the weaning stages as there will be fewer distractions.
