

Rainfall System

The Exo Terra® Monsoon RS400 is a programmable rainfall system suitable for all types of terrariums and greenhouses. It helps maintain optimal humidity by generating precipitation at programmed intervals, the duration and frequency of which can be easily adjusted depending on the type of animal or plant housed. Frequent rainfall helps stimulate breeding behaviour, and is a necessity when housing live tropical plants such as Bromeliads, orchids, mosses, etc.

Monsoon RS400

High-pressure Rainfall System

- Programmable rainfall unit for terrariums and greenhouses
- Easy to install on any type of terrarium or greenhouse
- Multiple nozzle applications (up to 8!)
- Large 4 liter (1 gallon) reservoir

The system can be programmed to rain multiple times per 24-hour cycle, for time periods ranging from one second to two hours. The large 4 liter (1 gallon) reservoir ensures continuous operation for several days without the need for refilling (ideal for vacations!), and the reservoir can be easily replenished without needing to uninstall the entire system.

The Exo Terra® Monsoon RS400 comes with two easy-to-install nozzles, but the system can be extended to accommodate up to 8 nozzles, making it ideal for multiple terrariums. The rain produced by these specially designed nozzles is extremely fine, creating a mist-like effect in the terrarium or greenhouse, and the extra long tubing makes it possible to conceal the unit in a storage area or under the terrarium in a cabinet.

PT2495 Monsoon RS400 22 x 22 x 33 cm / 8.5" x 8.5" x 9"
 PT2496 Remote Control Monsoon RS400

Easy to connect and install.

Sloping Top: makes filling water reservoir easier.

Specially designed Nozzles for fine mist

Easy to install tubing; fits through the closeable wire/tube inlets (featured on all Exo Terra Terrariums).

Optional Remote Control (not included, sold separately)

Mister

The mister helps maintain optimal humidity. Frequent rainfall helps stimulate breeding behaviour, and is a necessity when housing live tropical plants such as Bromeliads, orchids, mosses, etc.

Mister

Portable Pressure Sprayer

- Adds moisture to reptile habitats
- Helps maintain optimum terrarium conditions
- Large 2 litre (67.5 fl oz) reservoir
- Adjustable spray nozzle
- Locking mechanism for continuous spraying
- Compact, light and easy to operate

The Exo Terra Mister is an easy-to-use pressure sprayer that eliminates the chore of using trigger sprayers. The spray nozzle can be adjusted to allow either single stream or full mist spraying, and it has a locking mechanism that allows for continuous spraying. The large capacity reservoir holds 2 litres (67.5 fl oz) and is ideal for use with larger or multiple terrariums, outdoor set-ups, and in greenhouses.

PT2491 Mister

Pump to build up the pressure in the reservoir. Do a small test spray first to find the ideal pump pressure. Do not over pump.

For continuous spraying, press the second button on the handle

Turn the nozzle on the spray head to adjust spray width as necessary.
