

Nutrafin MAX from Hagen Manufacturer Of The Year 2009

A group of independent fish keepers were asked to test Nutrafin Max foods in their own aquariums. Here are some of their comments...

"Food - Absolutely first class!"
Harold Pullan

"I feel they are a good quality food that I can trust, and they are priced well."
Toby Ford

"I liked the fact that it also had the actual shrimp in, which the bigger fish enjoyed and there was no wastage"
Darren McEwen

"The highlighting of vitamin and yeast content is also re-assuring as to the quality and nutrition offered by the food"
Michael Swanson

"The Colour Enhancing Flakes do seem to have enhanced the colours of all the tank's inhabitants in contrast with other manufacturers' products. I cannot think if anything that is missing from the range, it is very comprehensive."
Gary Russell Steele

"I found all the cichlid specific tablets were readily acceptable by all cichlids, and indeed by every other fish in the tank"
Conrad Barrowclough

"I particularly like the flakes with freeze dried ingredients mixed in as I have not seen this before and my saltwater fishes seemed to like it a lot"
Robert Akehurst

"I really liked the "unusual" flavours, such as Earthworm and Brineshrimp. I've never come across earthworm flavour before"
Adam Critien

"I like the baby fish food as it seems to encourage quicker growth in live bearer fry"
Derek Graeme
