

# NUTRAFIN®

## Water Conditioning Application Guide

		Biological Water Conditioners & Treatment			Tap Water Conditioners & Fish Protector		Water Adjusters				Plant Nutrients	
		Cycle	Waste Control	B-Clear	Aqua Plus	Chlor X Change	pH Adjust Up	pH Adjust Down	pH Stabilizer/KH Booster	African Cichlid Conditioner	P-Clear	Plant Gro Iron Enriched
<b>Maintenance</b>	Weekly optimum biological support	●	●									
	Partial Water change	●			●							
	Water change marine aquarium w/protein skimmer	●				●						
	Water top up				●	●						
	Filter maintenance	●	●									
	Plant feeding											●
<b>Specific Treatment</b>	New fish introduction	●			●							
	New aquarium installation	●			●		●	●	●	●		
	Water cloudiness (biological)			●								
	Water cloudiness (particulate)									●		
	High ammonia and/or nitrite level(s)	●						●				
	After medicating	●			●							
	Transporting fish				●							
	Fish abrasions, lacerations or wounds				●							
	Fish loss	●										
	Surface film reduction & control		●									
	pH adjustment						●	●				
	KH increase required (improve pH buffering)								●			
	pH regularly drops						●		●			
	General Hardness increase required									●		
<b>Aquarium Type</b>	Heavily Stocked Aquariums	●	●		●		●		●			
	Cichlid & Goldfish aquariums	●	●		●				●			
	African Cichlid & Hard water aquariums	●	●		●		●		●	●		
	Planted aquariums	●	●		●			●	●		●	●

\*pH Stabilizer (KH Booster) will increase pH levels in soft water aquariums

● Regular maintenance activity

● Test before application
